Continuation of 5.The previous Advisory Action is hereby withdrawn in light of the Renewed Petition For Acceptance Of An Unintentionally Delayed Priority Claim, filed 08/03/2011, to consider Applicant's amendment to the specification filed on 07/22/2011.

Applicant's reply has overcome the following rejection(s): The rejection of Claims 1-11 under 35 U.S.C. 102(b) as being anticipated by Nishibu et al. is withdrawn. Based on the amended priority paragraph, the instant application is a US national stage application PCT/JP2005/000737, filed on January 21, 2005, and a CIP of PCT/JP2004/000504 filed on January 21, 2004, which claims priority under 35 U.S.C.§ 120 to PCT/JP2004/000504 filed on January 21, 2004. On February 12, 2010, the Applicants submitted a verified translation of PCT/JP2004/000504. The effective US application date of PCT/JP2004/000504 is the international filing date of January 21, 2004. This date is within one year of Nishibu (August 1, 2003), therefore the rejection under 35 U.S.C. 102(b) over Nishibu is withdrawn.

Continuation of 13. Other:

Applicant traverses the 103 (a) rejection on the grounds that "the skilled artisan would perform binding of protein in the presence of methanol only, but would not think to add SDS, because of the disclosures in the cited art." This argument is not persuasive for the reasons set forth in the Final Office Action. In addition, it is noted that, in Abstract, Jacobson indicates that both methanol and SDS are commonly used additives for immobilizing proteins. This common knowledge would have led one of ordinary skill to modify the teachings of Cheley to arrive at the claimed method. The rejection of Claims 1-11 under 35 U.S.C. 103(a) over Chely et al., and in view of Jacobson et al, is therefore maintained.
